THE RECRUITMENT CHALLENGE

Most Agencies Promise Great Hires.

Few Actually Deliver Them.

Wrong Hires Are Catastrophically Expensive

A bad hire costs 3× the annual salary. Generic agencies prioritise speed over fit — leaving you with someone who looks right on paper but causes real damage in practice.

44 Days Average Time-to-Hire

Every open digital or engineering role costs ₹35L+ in lost productivity, delayed projects, and competitive disadvantage. That's not a recruiting problem — it's a business risk.

Zero Visibility into the Pipeline

Most clients spend more time chasing their agency than running their business. No dashboards. No status updates. No accountability. Just silence — then a batch of wrong CVs.

The Solution: We replace guesswork with precision — and promises with proof.
